PROFESSIONAL SUMMARY

Results-driven Full Stack Developer and CS Student at **FAST-NUCES** with specialized expertise in **Deep Learning and NLP**. Proven track record in building multi-tenant SaaS platforms and custom Transformer architectures. Expert in bridging the gap between complex AI models (RAG, Vision Transformers) and scalable production environments using the MERN stack and Next.js.

TECHNICAL SKILLS

- **Development:** React.js, Next.js, React Native, Node.js, Laravel, Django, Tailwind CSS, Flutter.
 - **AI & Data:** Transformers, RAG Pipelines, PyTorch, TensorFlow, Vector Databases, SQL/NoSQL.
 - **Software Engineering:** TestOps, CI/CD, Git, REST APIs, UI/UX Design.
-

WORK HISTORY

Web Developer | Tigrac IT Limited (April 2025 – January 2026)

- Architected modular web solutions using **React.js and Laravel**, focusing on high-performance architecture.

Intern Web Developer | AllZone Tech (June 2025 – August 2025)

- Optimized frontend components in **React.js**, improving user retention through enhanced UI responsiveness.

Intern Web Developer | Innvoy Tech (June 2024 – September 2024)

- Maintained full-stack applications using **Django**, integrating automated logic for data processing.
-

CORE TECHNICAL PROJECTS

- **Agent Architect (AI & Tools):** Built an autonomous agent orchestration tool featuring custom personas and a drag-and-drop workflow interface.
 - **Stora SaaS (Full Stack):** Developed a multi-tenant platform with **Role-Based Access Control (RBAC)**, fraud detection, and multi-store management logic.
 - **Clinical RAG System (NLP):** Implemented a Retrieval-Augmented Generation pipeline with a **Streamlit UI** to analyze MIMIC-IV clinical data.
 - **Urdu NMT & Chatbot:** Designed a custom Transformer from scratch for Roman Urdu transliteration using multi-head attention and BiLSTM.
 - **NexCareer:** Developing an AI-driven career recommendation engine utilizing advanced matching algorithms (In Progress).
 - **Regent AI:** Engineered a **multi-expert pipeline** integrating four custom models: Ball Tracking, Batting Classification, Bowler Detection, and Pose (Skeleton) Estimation.
-

EDUCATION

- **BS Computer Science | FAST-National University (NUCES), Faisalabad** (2022 – Present)
- **F.Sc Pre-Engineering | Sandal College for Boys, Faisalabad** (2020 – 2022)
